

SMART INDIA HACKATHON 2026

Presentation Content for SIH26033 (Fasalora)

Note: This content uses your exact provided text and tech stack, formatted to match the structure of the reference PDF (SnapFix).

Slide 1: Title Slide

SMART INDIA HACKATHON 2026

- **Problem Statement ID:** SIH26033
- **Problem Statement Title:** Multiple intermediaries reduce farmers earnings and increase consumer prices
- **Theme:** Agriculture, FoodTech & Rural Development
- **PS Category:** Software
- **Team ID:** [Your Team ID]
- **Team Name:** [Your Registered Team Name]

FASALORA

Smart Farm-to-Customer Network

Slide 2: IDEA / SOLUTION

Project Name: Fasalora – Smart Farm-to-Customer Network

PROPOSED SOLUTION:

Connects farmers directly with customers and bulk buyers, providing end-to-end pickup and delivery support.

- **Farmers:** Register and receive a Unique Farmer ID. They can list crops with quantity, quality, and price.
- **Customers:** Can browse and buy exactly the quantity they need.

How it Addresses the Problem:

- Reduces unnecessary middlemen.
- Helps farmers get better prices.
- Provides customers with fair and transparent pricing.

Slide 3: TECHNICAL APPROACH

(Create a flowchart diagram on this slide based on the flow below)

Technologies Used:

- **Frontend:** React, HTML, Tailwind CSS
- **Backend:** Python, FastAPI
- **Database:** Supabase / PostgreSQL
- **Authentication:** JWT, OAuth
- **Deployment:** Vercel

Working Flow:

Farmer Registration

Unique Farmer ID

Slide 4: FEASIBILITY AND VIABILITY

Feasibility:

- Uses modern and widely used technologies.
- Web-based system is easy to access.
- **Supabase** provides scalable database services.
- **FastAPI** provides a lightweight backend.
- **Vercel** supports easy deployment.

Challenges (Risks):

- Farmer digital awareness.
- Internet connectivity in rural areas.
- Delivery management.
- Maintaining accurate crop quantity.

Slide 5: IMPACT AND BENEFITS

(Use a circular diagram or flow-chart here for the Overall Impact)

Farmers:

- Better access to customers.
- Better price realization.
- Digital Farmer Identity.
- Wider market reach.

Customers:

- Direct access to farm produce.
- Buy only the quantity they need.
- Better price transparency.
- Easy order tracking.

Slide 6: RESEARCH AND REFERENCES

Research & Study:

- **e-NAM:** Studied existing agricultural market connectivity.
- **Agmarknet:** Studied agricultural market price information.
- **FPO Model:** Studied farmer aggregation and market access.
- **Supply Chain Research:** Studied intermediary-related inefficiencies.
- **Route Optimization:** Studied efficient pickup and delivery.

Technical References:

- React
- FastAPI
- Supabase / PostgreSQL
- JWT & OAuth
